## Work Experience

### Coding Experience

Jan 2024 – August 2024

Full Stack .NET Developer

- Created [Bug Tracker](#), a multitenant ticket tracking system using ASP.NET Core MVC and PostgreSQL. Enables companies to track projects and the lifecycle of the trouble tickets within. Implemented user and role-based security to establish separation of duties.
- Created a [Blog](#) platform using ASP.NET Core MVC and PostgreSQL. Implemented a role-based security system, file upload, search, and email service. Database interaction is done through LINQ to Entity Framework.
- Created an [AddressBook](#), web application which provides each user a contact book with complete information about the contact, including the user profile picture, name, phone number, email and address. It also features a search feature to find contacts quickly. The user can also have one or many users in a category, with the ability to email one or many contacts in a category or multiple categories.
- Created [Portfolio](#), a static site to showcase my abilities as a developer using HTML, JavaScript, CSS, and Bootstrap.
